Section 1: Shifting Sites

The first section of the book examines the shifting sites of media and communication production, distribution, and consumption. The authors in this section explore the ways in which globalization, digitization, and social media are transforming the media landscape. They also consider the implications of these changes for media ownership, control, and access.

Section 2: Shifting Methods

The second section of the book examines the shifting methods of media and communication research. The authors in this section explore new and innovative approaches to studying media and communication, including digital ethnography, computational analysis, and network analysis. They also consider the ethical challenges posed by these new methods.

Section 3: Shifting Politics

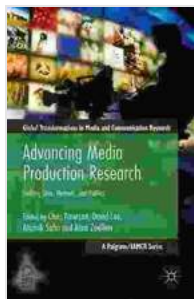

The third section of the book examines the shifting politics of media and communication. The authors in this section explore the ways in which media and communication are used to construct and contest power relations. They also consider the role of media and communication in social movements and political change.

Shifting Sites, Methods, and Politics: Global Transformations in Media and Communication is an essential resource for anyone interested in the study of media and communication. This groundbreaking work provides a comprehensive overview of the field and offers new insights into the future of media and communication.
