This guide will teach you everything you need to know about using Google Classroom, from creating a class to adding students and assigning work. We'll also cover some of the most popular teaching apps that can be used with Google Classroom.

Creating a Google Classroom Class

To create a Google Classroom class, you'll need to have a Google account. Once you're signed in, go to the Google Classroom website and click on the "Create Class" button.

You'll need to provide a name for your class and a section. You can also choose to make your class public or private. If you make your class public, anyone with the link can join. If you make your class private, you'll need to invite students to join.

Once you've created your class, you can start adding students. To do this, click on the "People" tab and then click on the "Invite students" button.

You can invite students by email address or by sharing a join code. If you invite students by email address, they'll receive an email with a link to join your class. If you invite students by sharing a join code, they can enter the code on the Google Classroom website to join your class.

Adding Assignments to Google Classroom

To add an assignment to Google Classroom, click on the "Classwork" tab and then click on the "Create" button.

You can choose to create an assignment from scratch or from a template. If you create an assignment from scratch, you'll need to provide a title, description, and due date. You can also attach files to your assignment.

If you create an assignment from a template, you can choose from a variety of pre-made templates. This can save you time and effort.

Once you've created an assignment, you can assign it to your students. To do this, click on the "Assign" button and then select the students you want to assign the assignment to.

Grading Assignments in Google Classroom

To grade assignments in Google Classroom, click on the "Classwork" tab and then click on the assignment you want to grade.

You can grade assignments online or offline. To grade assignments online, click on the "Grade" button and then enter the student's grade.

To grade assignments offline, click on the "Download" button and then open the assignment in a grading program. Once you've graded the assignment, you can upload it back to Google Classroom.

Using Teaching Apps with Google Classroom

There are a variety of teaching apps that can be used with Google Classroom. These apps can help you create engaging lessons, give feedback to students, and communicate with students and parents.

Here are a few of the most popular teaching apps that can be used with Google Classroom:

- **Google Docs:** Google Docs is a word processing app that can be used to create and share documents with students. Students can use Google Docs to write essays, create presentations, and collaborate on projects.
- **Google Sheets:** Google Sheets is a spreadsheet app that can be used to create and share spreadsheets with students. Students can

use Google Sheets to track data, create charts and graphs, and perform calculations.

- **Google Slides:** Google Slides is a presentation app that can be used to create and share presentations with students. Students can use Google Slides to create presentations for projects, speeches, and reports.
- **Google Forms:** Google Forms is a form builder app that can be used to create and share forms with students. Students can use Google Forms to take quizzes, surveys, and feedback forms.
- **Nearpod:** Nearpod is an interactive presentation app that can be used to create and share interactive lessons with students. Students can use Nearpod to watch videos, take quizzes, and participate in polls.

Google Classroom is a powerful tool that can help teachers and students stay organized and connected. It's a great way to share assignments, give feedback, and communicate with students and parents.

This guide has covered everything you need to know about using Google Classroom, from creating a class to adding students and assigning work. We've also covered some of the most popular teaching apps that can be used with Google Classroom.

If you're looking for a way to improve your teaching, Google Classroom is a great option. It's free, easy to use, and can help you create a more engaging and effective learning environment for your students.
